Subject: East Troy Site - Groundwater Ordinance

Tom,

Adrian Palomeque, our Community Involvement Coordinator, met with Troy residents on 12/15-12/17 to get input on the Community Involvement Plan that EPA is developing for both East Troy and West Troy Sites. During the meeting, an 80-year old couple, Ruth and Charles Ferguson at 1227 East Main St. told Adrian that they using their well water but it is **not clear** if they are drinking the water.

I understand the City of Troy has a groundwater ordinance restricting potable groundwater use but not for non-potable uses. Wanted to pass this along in case you want to follow-up with them. Their phone number is 937-339-8473. Shari

Fyi – If you talk to them, they also mentioned that there is an unusual brown area on their front yard where the grass remains brown throughout the year. They were wondering if water or soil contamination could have something to do with the grass not growing properly in that area.
